

“Our residents are extremely happy!”

- Jerry Knight, General Manager, Sandy Suburban Improvement District

The Sandy Suburban Improvement District (SSID) in Sandy, UT implemented the Sewer & Water Insurance Plan (SWIP) in October 2014. SSID maintains approximately:

- 165 miles of pipe.
- 3,200 manholes.
- 10,000 residential connections.

Since implementing the plan:

- 958 homeowners claims were received.
- 596 resulted in repairs.
- Most repairs were made using CIPP lining, followed by spot repairs and pipe bursting technology.
- The overall health of SSID’s lateral system was much improved.

“Our residents are extremely happy,” says SSID general manager Jerry Knight. “We went with SWIP because of its ability and willingness to customize our program and provide a total solution,” says Knight.

This groundbreaking insurance plan has allowed SSID to ensure the holistic health of their entire sewer system including assessment, rehabilitation and repair of all the nearly 10,000 private lateral lines.

An Effective Solution to
Your Municipality’s Lateral
Repairs Problem

SWIP

**SEWER & WATER
INSURANCE PLANS**

Powered by Evolution Insurance Brokers, LC

This is an informational pamphlet only. It does not imply that we have any knowledge of your current lateral sewer structure. This is not a guarantee of coverage.

Rev. May 2021

Why SWIP?

The big difference between SWIP and other programs is that SWIP is not a warranty or opt-in program. It is a customized, effective solution with a partnership approach that includes the needs of the homeowner and municipality.

Here are some other reasons why municipalities choose us:

- No waiting periods!
- No deductibles!
- We cover all repairs up to \$15,000 (many programs only offer partial coverage)!
- We meet EPA standards and requirements!
- Pre-existing conditions will not be excluded.

How Your Municipality Will Benefit

Avoid arguments over who is responsible for lateral repairs

Your residents will call to thank you instead of complain when their lines break.

Affordable solution for your residents

No longer will residents have to pay out of pocket in the event of a broken line.

Repairs meet EPA standards and requirements

Rest assured that your municipality won't be fined by the EPA or damage the environment.

Eliminate stress by avoiding headaches from lateral line problems

We manage all aspects of the repair process, freeing up your staff's time and sanity!

Helps reduce infiltration and inflow issues.

Sewer & Water Insurance Plans (SWIP)

TYPE OF PLAN

| Restoring public road, sidewalk required by permit | Included |
| Acts of God: floods, landslides, sinkholes (excluding earthquakes) | Included |
| Loss to unoccupied homeowner over 30 days | Included |

*Other limits available

How It Works

1. Homeowner calls hotline if they experience a lateral issue.
2. Inspector visits the property to validate claim.
3. If a claim is valid, then a reputable contractor is sent out.
4. Pipe(s) gets fixed according to EPA standards.
5. Landscaper is sent out to fix all grass, trees, etc.
6. Repairs are covered (up to \$15,000) so both homeowner and municipality are happy!

“Contractors were there in a day and the entire process was completely fixed within about 10 days. Really appreciated the expert and professional service and fantastic program that was provided.”

-- Homeowner Served in January 2018
