SWIP allowed us to customize our program and provide a total solution. This ground-breaking insurance plan ensures the holistic health of our entire sewer system including assessment, rehabilitation, and repair of nearly 10,000 private lateral lines.

Sandy Suburban Improvement District (SSID) in Sandy, UT implemented SWIP in October 2015. SSID maintains approximately:

- 165 miles of pipe
- 3,200 manholes
- 10,000 residential connections

Since implementing the plan:

- 958 homeowner claims were received and 596 resulted in repairs
- Repairs were made using CIPP lining, spot repairs and pipe bursting technology
- SSID reported improved overall health of their lateral system
